

Dear Bayle Musam

I am box cretan you have a ghost deep deep inside your jail.

As I approached it during the school trip today, I am absolutely positive that the metal gates rattled

~~the~~ without any human intervention.

Children even commented that the cameras flickered and something seemed rustled across the screen.

Personally it didn't scare me as I am quite used to the ghost's and their creepy environments. Perhaps you could use the ghost of St. John's as a really tourist attraction to bring more visitors to your fascinating museum. The keep spiral staircase the mice and medals all made our visit very interesting.

So if you do need help to keep your ghost under control I would

Be happy to help.

your sincerely

Phoenix Pickering
